Subject:	Re: Amadeus and Sabre web services

Thx Juan. My concern is they simply block our access to their APIs like they did in the past when they cancelled our ability to get to the GDS connection.
Jim

Subject: Amadeus and Sabre web services

Do we know anybody that we already connect to that could exposure the Sabre and Amadeus web services to us? [REDACTED] I ask as I think about the vulnerability to FLX for either Sabre and Amadeus web services where they could, and probably will, limit this access.
Thanks. Jim
